

News on EMLTD

European and Mediterranean League against Thrombotic Diseases

Greetings of the president

Dear colleagues,

We are finishing another year of our life, a particularly rich year in the life of EMLTD. This year two important facts marked our Mediterranean League. After a long period of pandemic, last June in Lisbon we resumed an in-person congress. With a good number of participants, as well as a tremendous scientific program, excellent faculty and a good number of abstracts received, ALPIC 2023 was a successful conference.

João Morais, MD, PhD

The second fact to highlight is the recently arrived new Executive Committee and the new President of EMLTD. Following the excellent work done by Alexandros Tselepis in a very difficult situation and going through difficult times, I assumed the presidency of EMLTD for the next two years. I hope to be at the high level of my predecessors. An important task that will guide my mandate is to increase the visibility of the league while maintaining the prestige and success of the past.

Welcome to the new Executive Board members. Portugal, Spain, Italy, Greece, Croatia, Slovenia and France are the countries represented on the board confirming the multinational composition of EMLTD.

Finally, we need the support of all EMLTD members to increase our family. Please pass EMLTD to your colleagues and ask them to register. It is urgent to increase the number of members, essential to be stronger

Please do not hesitate to contact me or other board members with your suggestions and critics

I wish you all Merry Christmas and a Happy New Year

João Morais

Editor's Corner - Teresa Padró: Reviewing 2023 and looking ahead to the 2024

Dear colleagues, dear friends,

We hope you have had a healthy and productive 2023 and we take the opportunity of our last Newsletter of 2023 to thank you for being the heart of our community!

Here's a look back to review the most important activities of our Society this year.

Teresa Padró on behalf of the
EMLTD Board

In **education and dissemination** of last breaking information, a major aim of our Society, we must highlight:

- 🕒 The **28th ICT biennial congress**, held in June in Lisbon, where we had the opportunity to attend an extraordinary scientific program and enjoy meeting face-to-face with old friends and colleagues. The program and scientific presentations are available for all members on the EMLTD **WEB-page**.
- 🕒 Three **remarkable WEBinars** organized by our colleagues from France and Italy on three relevant and challenging topics such as COVID and Thrombosis, anti-XI/Xia anticoagulants and coronary thrombosis and distal embolization.
- 🕒 A great **Workshop on "Real-World Data on Thrombosis Incidence and Treatment in different countries affiliated to EMLTD"** that counted in the discussant panel with members of our Society of high international recognition.

The session was a **scientific event of ALPIC-2023**, an international course on Platelets and Thrombosis that is organized by the EMLTD Foundation yearly in Greece and has Prof. Alexandros Tselepis as one of its Directors. The session was open to all EMLTD members and will be available soon on the EMLTD WEB.

Communication and interaction among members of the Society is a key aspect that EMLTD wants to promote. The regular newsletter is the first initiative, but some more are planned for 2024 as:

- 🕒 Start an archive of publications of interest, and include comments of publications that you can send us.
- 🕒 Give visibility through the WEB of the Society of the information that you send us in the area of "Thrombosis" (either international or local).
- 🕒 Create a corner to make consultations and direct interaction between members.

In 2024, we are in the way of organizing much more activities with the aim of engaging more actively and reach out to you. Stay tuned!

As the seasonal vacations are upon us, we wish you all the best with family and friends and wish you all the best for 2024.

Next EMLTD Webinar

EMLTD Webinars 2023
Coordinated by Prof. Vittorio Pengo

Presents:
Difficult cases of acute
pulmonary embolism

Wednesday January 17th
17:00 CET

Invited speaker:
Stefano Barco, Department of Angiology,
University Hospital Zurich, Switzerland
